Looking to create an overall campus map that identifies all drives, parking lots and the hospital and clinic buildings. My request would be to replicate the color and format of two previous maps (see the sleep center maps from CS # 005281) while incorporating much of what's below (all parking lots labeled except for provider, all roads/driveways, the EMS garage and Highway 14/South Center Street). The legend in the screenshot may not be necessary. This graphic can be as tall as you need it to be, but we'd better keep it to 700px wide for use on the website.
